

About Me

A Cum Laude graduate in Computer Science, I am a dedicated Full Stack Developer with proven experience in React, Node.js, PHP (Laravel/CakePHP), and database management. I specialize in building and deploying efficient web solutions, including extensive experience as a CMS Developer, primarily utilizing WordPress for corporate and complex website projects. I contributed to real-world projects at My Creative Panda Inc. and offer technical versatility gained from PC support, graphic design, and managing printing operations. I am a collaborative problem-solver who continuously seeks to learn new technologies and deliver high-quality professional results.

Work Experience

Freelance Web Developer

2025-present

I designed, developed, and deployed Full Stack web applications, including complex systems like an Employee Management System, utilizing React, Node.js, PHP, Laravel, and CakePHP with databases such as MySQL and PostgreSQL. I also developed and maintained corporate websites, including a real estate platform, leveraging WordPress and PHP.

DG Computer Services

2025-present

Managed all printing operations, including large-format output, while also functioning as a Graphic Designer creating custom layouts for invitations and tarpaulins. My technical role involved providing PC support, diagnosing and troubleshooting hardware and software problems, and performing system reformatting and optimization to ensure client satisfaction and device functionality.

My Creative Panda Inc.

2025

Assisted in developing websites using the CakePHP framework and WordPress. Applied technical and problem-solving skills to create responsive and functional web solutions. Utilized computer skills to work with various development tools and software. Collaborated with senior developers and project teams to complete client-based projects efficiently.

iPhiTech IT and Digital Solutions Corporation

2023

Utilized technical skills and problem solving skills on developing websites. Utilized computer skills on software used on developing websites. Collaborated with fellow interns and mentors throughout the internship to create projects.

Projects

RLC Residences Website

HTML, CSS, JavaScript, PHP (Wordpress)

Developed and managed a professional, lead-generating website for an Accredited Senior International Property Specialist promoting RLC Residences (Robinsons Land Corporation). The platform is designed to showcase a portfolio of pre-selling and ready-for-occupancy luxury residential developments

Umap-It Website

HTML, CSS, JavaScript (Wordpress)

An interactive learning website with a map-inspired flowchart design for U-substitution in calculus, providing an engaging educational experience.
